

**SIERRA
RECTANGULAR DINING
TABLES**

Our Sierra collection in eco-Teak™ offers an attractive, low-maintenance alternative to natural teak. Made from solid, high-density Polystyrene, eco-Teak is the finest, most natural-looking synthetic wood available. Our Vintage finish uses a blend of colors to simulate natural woodgrain, and the material is colored throughout for fade resistance. Long spans on frames are braced with rustproof, powder-coated aluminum to prevent warping over time, and all items are constructed using traditional joinery and #304 stainless steel hardware. The 74.5" dining table seats 6 and includes a 1.5" umbrella hole to accommodate our 9' market umbrella; the 91" dining table seats 8 and includes a 1.5" umbrella hole to accommodate our 9' market umbrella.
